MONEY MARKET.

WEDNESDAY, Jan. 19-6 P. M. All the leading fancies to-day are in active demand, but nearly every transaction at the first board was on time, principally buyer's option. Eric Rail-road has been particularly active within the past day or two, at depreciating prices. There are, however, strong party of buyers in the market who can manage the movement a good deal as they please. It is our impression that the stock will not go much lower. There were large sales of Long Island, Harlem, Phœnix, and all the other coal stocks; Morris canal, and Nicaragua Transit. A new stock made its appearance in the street this morning; it is called the Chesapeake and Ohio Steam Transportation Coal Company. This is the first we have ever heard of it, and can hardly tell from its name whether steam navigation, coal transportion, or coal mining, will form the business of the company. There was a pri vate sale of 1,000 shares of St. Lawrence Lead Mining Company, yesterday, in one lot, at 3% per cent. At the close of the first board the variations in prices, compared with those current yesterday, were triffing. At the second board, Long Island was in demand at an advance of 11 per cent. New Creek Coal went up ? per cent; Florence and Keyport !; Panama Railroad J. Erie Railroad and Nicaragua closed about the same.

The receipts at the office of the Assistant Trea-

surer of this port to-day, amounted to \$121,422 68; payments, \$32,124 53—balance, \$2,944,495 78.

The work at the mines of the Great Northern Lead Company is progressing, we hear, as rapidly as posbut in consequence of delay in receiving the crushing machines, the lead will not be in the market so soon as was expected-probably not before the second week in February. The superintendent ee at the mines writes as follows, under date of 15th inst. :-

"In driving the eastern end at the Union Mine, the men to-day, have out into a large lode of lead, better than any thing we have yet had. It is worth \$550 per fathom. The ore is not solid, but very near it. The frame of the crusher was finished to-day, and the house will be done by next Friday."

Some rich specimens have just been received from

these mines, which are placed, for the present, in the office of Mr. Downing, 66 Wall street.

We regret to learn that Col. James L. Curtis, who has been officially connected with the New Jersey Zinc Co., since its organization in the spring of 1848, and, in fact, its acting President from that time until now, has tendered his resignation as President, to the company. Though contemplating this step for some months, he has delayed it until the affairs of the company should be placed on a basis of complete which we are gratified to learn they now are. Col. Curtis is entitled to great credit for the intelligence, energy, and enterprise, with which he has so directed the efforts of the Zinc Co. that it is now second to no mineral interest in the country. During the century or more since the minerals of ssex region were first known, some twenty attempts have been made to turn them to valuable practical account, and all failed until Col. C. and his associates put their shoulders to the wheel. They have raised an almost valuelss property to the value of a million and a half of dollars, besides vastly increasing the value of other contiguous mineral interests. In fact, they have placed New Jersey in the front rank of mineral States-The Zinc Company have made all their large expen. ditures for works, machinery, &c., for the manufacture of paints, and henceforward the company have only to go on and reap rich profits. The State of New Jersey has got the most valuable zinc property in the world. We regard the success of this zinc enterprise as a great blessing to man. It has secured a white paint, free from poison, that must come into universal use. In this light, alone, it is entitled to deep public interest. The ex-President still remains a director and a member of the company's executive committee. His resignation of the presidency, a post requiring much time, has been induced by the pressure of private business. His acting place will be filled to-day by the Vice President of the company, C. E. Detmold, Esq., who is known as one of the most intelligent and successful managers of iron works in this country.

In every statement now made, we find the full, est confirmation that the Westernport section of the Cumberland coal field, has the richest and thickest veins. The Parker Vein and the New Creek Company's, present the same accounts; the former having recently purchased on George's creek, some five miles above the property of the Phoenix, and without which they never could have made themselves what they now are-a company of credit and importance The coal which will hereafter be introduced in market, mined from the fourteen feet vein, from the specimens which have been exhibited, will pr nestic uses, much superior to any foreign coal imported. It has been frequently asked why the Phoenix does not send their coal forward? The answer is, they desire to establish a reputation, andtherefore, prefer to delay until they are prepared to mine from the fourteen feet vein, preferring to turn the coal of the six feet vein into coke, and make fire brick from the fire brick clay found in contact with the coal. For these purposes, and for furnace uses, this coal will answer perfectly.

That there will soon be a large manufacturing

community established in and about Westernport, admits of no doubt. Already have the Baltimore & Ohio Railroad Company constructed on the property of the New Creek, the largest machine shop in the country, except that of the Eric Railroad Company at Dunkirk. To the Phonix Company every additional enterprise involving the expenditure of mos ney, must, of necessity, increase the value of their estate. In the course of a few weeks changes will take place that will create much interest, and such will be the attraction that the Potomac region will be visited as a source of curiosity and investment. The new company, called the Chesapeake, &c., have their lands at the source of George's Creek, between Lonaconing and Frostburg, about twelve miles north of the Potomac river.

The receipts of the Cleveland, Columbus and Cin. cinnati Railroad during the month of December, 1852. amounted to \$74,854 45, against \$37,654 94 for the same month in 1851, showing an increase of \$37,199 50, being equal to nearly one hundred per

The finances of the State of Maryland, according to Governor Lowe's Message, are in a flourishing condition. The sinking fund, which was formed for the redemption of the public debt, amounted to \$2,728,075 41 on the first of December, 1852-an increase of \$474,278 24 on the year 1851. Other receipts soon to be paid, will swell it to \$2,770,302 85. The Governor recommends the repeal of the "Stamp Tax," and a reduction in the general State taxes. The Governor characterizes the formal opening of the Baltimore and Ohio Railroad, as one of the most important events in the history of the State.

The Governor of Wisconsin, in his message to the Senate and Assembly of that State, says that the fund in the treasury has been sufficient to meet all de. mands upon it during the past fiscal year, both the current liabilities of the year and the unpaid indebtedness of the year 1851, within the small sum of \$940 71. The general fund received from Dec. 31, 1851, to Dec. 31, 1852, was \$133,652 62; amount disbursed in 1852, \$134,593 33; over paid out of this fund, \$940 71. Of the above disbursements during the year 1852, there has been paid on liabilities incurred during the year, \$88,393 33; on liabilities incurred previously to 1852, and which remained unpaid, Dec. 31, 1851, \$46,200. The reports show that, had the full amount of the State tax due from the different counties for the year 1852, been paid into the treasury, there would have been a surplus, over the disbursements, and that the assessments were more than sufficient to meet the current expenses and liabilities of the year.

Governor King, of Missouri, in his message to the Legislature, speaks in the most gratifying terms of the financial condition of the State:-

Legislature, speaks in the most gratifying terms of the financial condition of the State:—

Returns from all the counties in the State, except ten for 1852, make the assessed value of all the taxable property, \$112,465,633,75, derived from these sources, value of lands \$45,438,609,75; town lots, \$30,580,354; slaves, \$22,810,675; other personal property, \$13,636,015. The assessed value of taxable property has been doubled in the last seven or eight years. The receipts into the treasury, from 1st October, 1850, to 1st October, 1851, amounted to \$480,256,60; from 1851 to 1852, \$472,423,05. Of revenue proper, for the first year, the sum was \$296,167 18; for the second year, \$236,579,91. Adding the gross amount of receipts together, and balance in treasury 1st October, 1850, and it makes \$657,972,79. Amount of warrants drawn on the treasury for two years, ending 1st October, 1852, \$391,787,63, and also \$280,668,79, amount due the bank for interest paid upon State bonds, and for which no warrant was drawn, but the Auditor was required to give the Treasurer a credit. A still further deduction of \$37,645,91 is to be made, on account of the deficit of the late Freasurer, and a still further sum of \$19,869,99, the amount of State bonds and interest on same paid by Treasurer, and which he holds as so much money. Deduct these sums, and it leaves chargeable on the treasury, 1st October, 1852, \$401,469,97. The revenue now being paid into the treasury, for 1852, with the amount in the treasury on 1st of October last, will be sufficient to defray the ordinary expenses of government—pay the interest on the State debt as it falls due—pay the State bonds falling due in 1853, and leaves a surplus for other appropriations. The State debt on the 1st October last, was \$857,000; but from this is to be deducted \$272,253,60, stock in the bank, is responsible for the principal. This leaves the State debt \$584,766,90. Of this amount \$255,000 falls due in 1858; and ample means will be in the treasury to meet it. After that is paid, the Sta
